

DURCO FILTERS by Ascension Industries

New product bulletin

Precoat, Backwashable, Tubular Filters

Durco Precoat Tubular Filters Are Specifically Designed For:

- ***Filtering compressible materials which can cause short cycles. Filter is capable of continuous and fully-automatic operation. Equipment provides extended filtration cycles and enhanced cake-release, reducing disposal costs.***
- ***Reducing initial capital equipment costs, since two filter vessels operating alternately are no longer required to obtain continuous filtration.***

- ***Sub-Micron Particle Filtration***
- ***Continuous Filtration – No Downtime***
- ***Liquids with sticky and highly compressible solids;***
- ***Instant Filtrate Clarity***
- ***Easy Cake Release***
- ***Extended Life of Filter Media (or Septum)***
- ***Longer Filtration Cycles before backwash***

Technical Data

Applications:

- Filtration of a wide range of solid / liquid separation applications
- Well suited for slimy liquids with high biological contents
- Best for applications containing 500 PPM or less of suspended solids

Suspended Solids Removal:

- Filters can be configured to handle several hundred GPM of flow.

Achievable Flow Rates:

- Skid mounted, multiple tube filter system. Pumps, valves, precoat tanks, and automation packages

Equipment:

- Stainless steel filtration systems are available for sizing your specific system
